

Environmental objectives and policy of Gerresheimer Vaerloese

Working to achieve a continuous reduction of the company's environmental impact in relation to our surroundings and society and ensure a satisfactory workplace environment.

Environmental policies:

1. Minimise the consumption of energy in proportion to the volume of output.
2. Observe the environmental legislation in force and cooperate actively with the authorities in relation to environmental questions.
3. Be open about the company's environmental impact to employees and the outside world.
4. Motivate employees – and suppliers working with the company - to fulfil all requirements and guidelines to protect the environment.
5. Motivate employees to point out to management the essential risks in the company's activity.
6. Reduce environmental impact through use of the best possible technology where financially viable, and cooperate with suppliers on this.
7. Provide customers with proper guidance on essential environmental aspects in relation to handling, use and disposal of products.
8. Minimise and prevent the risk of damage to employees and machines by targeted efforts to prevent damage incidence.
9. Insure the company against the risks considered by management to be essential.
10. Ensure a safe working environment.
11. Comply with ISO 14001.
